**COMMERCIAL & RESIDENTIAL**

## UNIQUE QUALITIES of GLOBAL GROUND SOLUTIONS

### Customer Service

To revive the lost art of true customer service. Performing our tasks in a honest and professional manner. To never forget our clients are the foundation of our company.

### Experienced Team

Global Ground Solutions employs only experienced field staff. Many team members have been in the ground stabilization industry for over five years and have held the title of "supervisor." This ensures that the men and women working on your project will be able to confidently handle any and all situations.

### Advanced Equipment

Global Ground Solutions has an advanced mechanic and machine shop dedicated to building the most advanced and highest quality equipment in the industry. With every project being unique we are able to custom design and build specialized equipment to complete your stabilization projects.

### Quality Workmanship

Global Ground Solutions is dedicated to using only the highest quality personnel, equipment and repair programs in the ground modification industry. Quality is never an accident; it is always the result of focused intention, sincere effort, intelligent direction and skillful execution.

## WHAT WE OFFER OUR CLIENTS

- Immediate response to bid requests.
- To bring the job in on schedule and proposed budget.
- To cause little or no collateral damage to the property.
- To maintain an informed and happy client throughout the project.

## TD-75 TEI Rock Drill

The TD-75 TEI Rock Drill is powered by 50 HP electric motor with a drilling torque up to 10,000 ft/lbs. The rigs unique design allows the tracks to close to a width of 30 inches enabling it to drive through most doorways and limited access areas.

## TK-50 Putzmeister

The TK-50 Putzmeister concrete pump is powered by a 96 HP Deutz diesel engine and is capable of pumping 54 cubic yards per hour at a maximum of 1150 PSI.

## Self-Contained 20 ft Drill Trailer

Our self-contained 20 ft drill trailer was designed to provide everything Global Ground Solutions needs to complete the drilling process, without having to unload heavy equipment on the project site.

## Transit, Rams & Power Pack

In the field, this combination of equipment provides us with the pinpoint accuracy and maneuverability needed to complete any ground stabilization project.
